AP Psychology Student-Assessment - Inquiry Question Research

Total mark /25

Note: I am interested in your ideas and comments. *Fully* answer the questions in your own words, and write for clear understanding. All questions refer to your AP Psychology Inquiry Question and Research. Turn in a Word document: use the subtitles and keep to the word count.

1. Questioning and predicting (30 words)

Explain how you formed or *designed* your inquiry question, to ensure it was based on scientific concepts/observation.

2. Planning and conducting (40 words)

Explain how you used ethical procedures and appropriate units* of AP Psychology classroom curricular content to collect and record data that supported your inquiry question. In other words, explain your “*method*” or “*procedure*” to answer your inquiry question.

(*Units: Scientific Foundations and Methods in Psychology, Biological Basis of Behaviour, Sensation and Perception, Behaviouristic Learning, Cognitive Psychology, Developmental Psychology, Motivation, Emotion, and Personality, Clinical Psychology, Disorders and Treatment, and Social Psychology)

3. Processing and analyzing data and information (40 words)

How did you use knowledge (texts or other sources) to *analyze cause-and-effect* relationships? In other words, how did you assess what was important and conclude the “*results*” or the answer to your question?

4. Evaluating (50 words)

Evaluate, or *judge, the method* (your own data collection or source data you used) you used to answer your inquiry question:

- a. What types of sources did you use and why?
- b. How did you decide to answer your inquiry question? What did you think was the relevant or appropriate way to answer your question?

5. Applying and innovating (40 words)

Referring to your inquiry question’s answer, what do you see as an area for *important further research* and study? Why do you think this area is important?

6. Critical and creative thinking (50 words)

- a. Explain how the inquiry question research made you think critically.
- b. Explain how the inquiry question research made you think creatively.
